

Communication in Schools

In partnership with HP and Microsoft, New Era can deliver a strong, unified communications system across the entire school network.

Transforming Your School's Communication Solution:

+ Standardise the device fleet and implement Teams

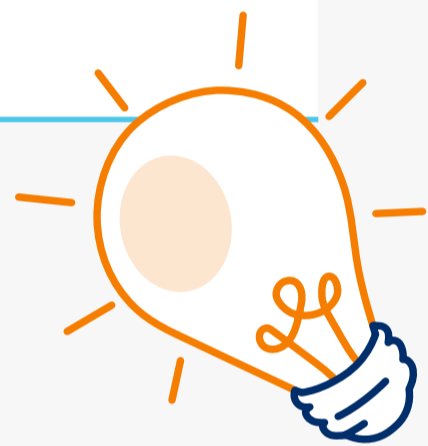

- Standardise operating systems across the entire fleet.
- Ensure all devices have the capacity to support Teams, including BYOD devices.
- We provide all the necessary training to make sure every teacher and student is up to speed.

+ Replace your wired telephony system

- We can utilise most, if not all of the existing infrastructure when implementing this solution.
- We will work with you to understand your school's layout, classroom configuration, and administration configuration.
- All classrooms will be setup with the same standard.

+ Ongoing Support

- Our highly experienced Service Desk are available to help with any questions post implementation. Support is always just a phone call away.
- You can rely on us to remotely manage and monitor your communications systems and prevent equipment failures or system outages during important meetings.

Why New Era?

Flexible

- We can demonstrate the key features of Teams and how they may be used in your setting.
- Ability to scale hardware and licenses to match growth in students, as well as upgrade new facilities.
- Can be managed under the school's existing network agreement (if installed by New Era).

Mobile

- A Teams Voice Service with New Era allows staff to keep a single phone number and make or receive calls from any device or handset.
- No need to worry about organising phone number redirects every time a member of your team needs to work from home.
- Easy integration with other modern systems such as emergency lock down and paging systems.

Reliable

- Continued IT support from set up right through to trouble shooting.
- We offer a highly experienced Service Desk for support.
- Our strong partnership with HP means that students and teachers are provided with devices that support all Teams functions.

Transforming your school with technology that enhances classroom learning experiences.
