

Generative AI Governance and Controls Assessment

The rapid advancement and adoption of complex and opaque artificial intelligence (AI) technologies has prompted organizations to reexamine IT Governance and Compliance and revalidate the efficacy of their technical Controls. New Era offers a dual-focus service to ensure adequate coverage for Generative AI in an organization's governance framework and the technical controls that ensure compliance.

Establish AI Governance, Risk, and Compliance

A comprehensive review of AI Governance protocols through the application of an industry framework to determine maturity level, identify areas of concern, and provide recommendations to enable secure and responsible use of Generative AI while fostering a culture of security and compliance.

Assess AI IT Controls

Driven by the GRC information collected in discovery, conduct an assessment of a targeted set of controls to understand exposure to AI-related risks and ensure robust controls for the safe integration of Generative AI in business practices.

New Era's Approach:

AI Governance Assessment

An evaluation of AI governance to guide the development, deployment, and use of Generative AI in a manner that is ethical, compliant, and aligned with the company's values and strategic goals with special consideration for its attributed risks:

- Lack of Transparency
- Accuracy
- Bias
- IP and Copyright
- Cybersecurity and Fraud
- Sustainability

AI IT Controls Reviews

An evaluation of a targeted set of controls to govern Generative AI operations, detect anomalies, and ensure compliance with industry regulations and best practices with special consideration for its attributed components:

- Assistants
- External/Internal APIs
- Agents
- Tools
- Storage
