

IT Migration Services: Mergers, Acquisitions, & Divestitures

Confidently connect your systems, people, and data across any transformation.

Whether your organization is actively engaged in a merger, acquisition, or divestiture (or addressing unresolved integrations from prior activity), New Era Technology is here to help. With deep expertise, proven tools, and a skilled team, we guide organizations through complex transitions and deliver a clear path to a successful end state.

Streamline today. Transform tomorrow.

Mergers and acquisitions are complex; IT costs tied to integration can vary widely. Investing just 5% of the total M&A spend in IT strategy and execution can lead to savings of up to 40% post-transaction—but only if it's done right. New Era can help streamline your approach, reduce long-term risk, and build a future-ready environment that supports your evolving business goals.

*Migrations fail when we only consider systems.
They succeed when we consider people.*

Partnering with New Era

From planning to execution, we help organizations confidently navigate digital transformation.

Suite of Services include:

- **IT Operations:** Managed Services, Security, Cloud Strategy

- Communications
- Media & Entertainment

Avoid Common Pitfalls

Success hinges on a solid IT strategy, and too often, that gets overlooked. Many organizations underestimate the scalability of their current systems or the limitations of their new partner's environment. Without a clear integration strategy, IT challenges can derail even the most promising business goals. New Era helps you look ahead, mitigate risk, and prepares your teams for a smooth, confident transition.

New Era Technology's proven four-phase approach ensures a smooth, scalable transition—from initial planning to long-term support.

New Era Technology's Digital Transformation Practice

We deliver digital, data, and technology solutions that move your business forward. Today's transformations are about more than just systems—they're about building agile frameworks that spark innovation, empower your teams, and deepen customer connections. Each engagement is tailored to meet your unique goals. As a global solutions provider, New Era offers flexible models, including project-based consulting, co-sourced teams, and strategic staffing.
