

# Advancing Security in Microsoft 365

New Era Technology offers a multi-point security inspection for your Microsoft 365 tenant to ensure your organization is running smoothly and securely.

## Improve Your Microsoft 365 Security Posture

Microsoft 365 (M365) is a prime target for cyber attackers due to its widespread use and the valuable business data it houses. Although Microsoft invests heavily in security, the platform's default security settings often require organizations to configure and fine-tune them to suit their needs. Many organizations, regardless of size, struggle to fully utilize the robust security features available within M365. Additionally, the constantly evolving threat landscape and frequent platform updates necessitate regular reviews and adjustments of M365 security controls.

New Era's SecureBlu M365 Security Assessment leverages our engineering expertise and status as a Microsoft Tier 1 Cloud Solution Provider to deliver a comprehensive annual assessment that ensures organizations are maximizing their Microsoft 365 security posture. Our approach is grounded in recognized standards, such as the Center for Internet Security (CIS) and the National Institute of Standards and Technology (NIST). Our security experts not only assess and configure your M365 environment but also educate your team on best practices, empowering your organization to better manage and maintain a secure setup.

### Benefits:

- **Enhanced Security and Compliance**
- **Improve Access and Governance**
- **Access Accurate Configuration and Monitoring**

### M365 Services Covered

- **Entra ID**
- **Intune**
- **Defender**
- **Exchange**
- **Teams**
