Protected Campus Solutions

Bringing together a diverse array of security technology to ensure the safety of your environment.

Networking & Connectivity – Support your security infrastructure with solutions ranging from IP enabled cameras, access control, wireless bridges and mesh networks.

Video Surveillance – Monitor & record solutions help ensure you always have a view of what's happening on your campus.

Access Control & Visitor Management – Track the movement of people in your environment to make sure the right people have access to the right areas. Add an extra layer of security with facial recognition software.

Mantraps and Pass-throughs – Create areas designed to restrict access and movement of suspicious visitors.

Mass Communication – Protect your assets and deliver critical messages by enabling security personnel and the users on your campus to interact quickly and easily to address security threats.
