

Security Program Maturation

DATA SHEET

One of the best ways to manage evolving cybersecurity risk is to continuously improve your security program. IT leaders need practical and actionable cybersecurity guidance, solutions, and training. No matter where you are in your cybersecurity journey, New Era's experts partner with you to evaluate and establish your security priorities, develop plans to reduce risk, and implement security solutions. New Era's world-class cybersecurity expertise will identify and drive key initiatives and processes with a practical approach to provide immediate and on-going value. We utilize industry-leading frameworks and established best practices to direct the most efficient and effective use of your resources while mentoring your existing teams.

New Era helps organizations overcome common cybersecurity challenges by providing:

- Regular evaluation and testing of security programs to identify gaps
- Continuous refinement and prioritization of security initiatives
- A clear roadmap for driving change and achieving goals
- A tailored approach to security for your unique business
- A range of expertise to mature the architecture, engineering, and operation of IT and security solutions
- Employee training and awareness

What's Next?

The Security Program Maturation service starts with us getting to know you! We begin with an evaluation and gap analysis of your current security program to create a customized roadmap that provides actionable next steps.

Benefits of Service

- Reduce security risks and advance your security posture
- Cost-effective security leadership
- Services capability spanning from strategy to ongoing management
