

# Collaboration Spaces

Flexible, Resilient, Productive Work Spaces

## Flexible

New Era Technology's ready-to-go collaboration space solutions are easy to deploy and operate—allowing you to quickly standardized and enhance the user experience across your organization.

Our scalable, enterprise-grade solutions are designed to support meeting spaces large and small using your preferred collaboration application. Touch Free or with Intuitive Touch Interface solution options are available.

Our solutions are complete with everything you need to present or place audio or video calls, increasing engagement and productivity through high-quality audio and video.

## Resilient

New Era's Video Network Operation Center (VNOC) Support Team will ensure you maximize your video conferencing solution's features and functionality with the right end-user and technical support.

## Productive

Create more productive meetings and increase user utilization and engagement with on-site and remote support, system monitoring, and scheduling assistance options.

## Features

**Full Room Participation** – Capture the entire room with an ultra-wide-angle camera. Intelligent zoom enables an automatic and dynamic field of view adjustment for meetings of all sizes.

**Wireless Presentation** – With BYOD connectivity present from your laptop or mobile device (Android and iOS, PC, and Mac supported).

**Full-range Audio** – Superior audio quality makes it sound like everyone is in the same room, creating a unified presence.

**Ideal Display Size** – Available in display sizes from 43" - 98", the optimal screen size is selected for your meeting space.

**Flexibility** – Collaborate using any web conferencing or UC application or service (Webex, Microsoft Teams, Zoom), for a Bring Your Own Meeting (BYOM) experience.

**Simple & Automated** – Using enterprise-level components ensure an easy-to-use experience of your presentation system.

**Professionally Managed & Installed** – Access to Project Manager for collaborative consultation and implementation by industry certified Technicians.

**Fully Engineered & Documented** – Solutions are expertly engineered and thoroughly documented to ensure to the highest-caliber experience.

**Comprehensive Training & Support** – Initial on-site training on system features and operation as well as on-going support is included.
