

Physical Security Solutions

New Era Technology's Global Physical Security solutions bring together an array of security technology to ensure the safety of your environment.

- **Networking & Connectivity** – Support your security infrastructure, from IP enabled cameras to access control
- **Video Surveillance** – Surveillance cameras ensure you always have a view of what's happening on your premises
- **Access Control & Visitor Management** – Track the movement of people in your environment to ensure the correct people have access to the right areas
- **Intrusion Detection** – Add a layer of security by detecting, tracking, and isolating intruders
- **Mantraps and Pass-throughs** – Create areas designed to restrict access and movement of suspicious visitors
- **Communication & Alerting** – Two-way communication solutions to enable security personnel and users to interact quickly and easily to address security threats
