

New Era Cloud Enrollment System

Secure Network Access for BYOD, Guest Users and IT-Owned Devices

New Era Cloud Enrollment System is a software/SaaS platform that delivers secure wired and wireless network access for BYOD, guest users and IT-owned devices. It streamlines getting devices on the network and secures every connection with powerful encryption. Cloudpath software gives you granular policy control over what network resources users can access. It lets you deliver a great end-user experience and virtually eliminates help desk tickets related to network access. New Era enrollment system supports any user, any device, and any network infrastructure.

Protect Your Network & Your Data with Powerful Security Features

New Era Cloud Enrollment System software secures network connections with WPA-2 Enterprise—the highest standard for secure Wi-Fi. The system encrypts data in transit between the device and Wi-Fi access points for maximum security. It lets you define and manage policies for role-based access—users only see the resources they should see. You gain visibility and control over what devices are on the network, and the power to revoke access at any time. A device posture check with remediation during onboarding ensures that only devices with appropriate security safeguards in place gain access.

BYOD Users Can Connect without IT Intervention

BYOD users can now self-provision their devices with intuitive self-service workflows quickly and easily with the simple onboarding portal in the Cloudpath software without IT intervention. BYOD users initially gain access with existing login credentials. The system installs a digital certificate on the device so that users authenticate seamlessly from that point forward—without having to re-enter a Wi-Fi password.

Give Visitors Easy, Self-Service Guest Wi-Fi

Easily answer the question, “How do I get on the Wi-Fi?” by allowing guest users to self-register for internet access via an intuitive portal and receive login information via SMS, email or printed voucher. The New Era Enrollment System delivers secure guest access for visitors without involving your IT help desk. You can customize the login portal, guest workflows, terms and conditions, and more for a trouble-free and secure user experience.

Features & Benefits:

- Secure multivendor network access
- Self-service onboarding and device enablement
- Digital certificate management
- Policy management
- Third-party product integration via API
- Increases security for the network, devices, users and data
- Streamlines network onboarding for BYOD users, guests and IT-owned devices
- Gives you the power to define and manage policies for role-based access
- Delivers visibility and control over what devices are on the network
- Dramatically reduces help desk tickets related to network access
