

## New Era SIP

New Era Technology's SIP as a Service is flexible, scalable, and offers world-class support.

New Era's SIP as a Service provides high-quality calling across North America and can be provisioned in real-time, installed, and turned up remotely. All within days and not weeks. New Era's SIP offers reliable access to cloud-based voice and E911 and is built for scale.

SIP Trunks allow you to eliminate costly telecom infrastructure and reap the benefits of converging your local and long-distance calling onto a single platform.

Our dashboard and suite of APIs let you self-serve to trigger ports, order, provision, and manage numbers in real-time.

### Highlights
