

Introducing Journey's Customer Enrollment

Onboarding and opening a new account can be time consuming and tedious, and fraught with risk for the individual and the business. The Customer Enrollment solution provides businesses a flexible and frictionless enrollment process, with a secure, guided approach providing optimized user experience. This solution fully supports KYC and AML requirements for financial sector customers.

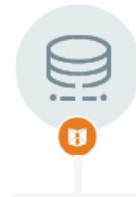

Provide Fast and Secure Digital Onboarding with Journey's Trusted Identity Platform

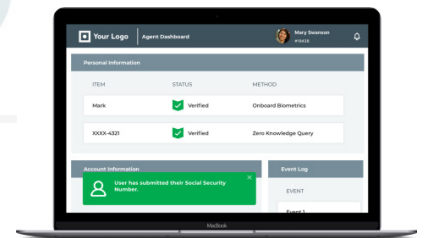

Mobile and desktop options to establish identity, verify regulatory and policy requirements, complete and e-sign enrollment documents

Journey orchestrates the process with all data individually encrypted and routed via our ultra-secure Zero Knowledge Network

Enterprise defined verification sources

Agent can monitor and guide the process in real time. The agent gets confirmation of completion but never sees sensitive data

Journey Benefits

- Establish identity using private or government issued photo IDs plus instant biometric verification.
- Utilizing sophisticated 3D facemaps creates ease and accuracy for an optimized customer experience
- Simple integration to your existing systems — transform enrollment processes quickly & securely
- Information is verified as steps are completed, avoiding surprise failures at the end of the process
- Use any device with a camera — mobile, tablet, laptop or desktop — to complete the process
