

## Physical Security Solutions

New Era Technology's Physical Security solutions bring together an array of security technology to ensure the safety of your environment.

- **Temperature Check** – Add an extra layer of protection with a one second, no-contact temperature scan tablet
- **Networking & Connectivity** – Support your security infrastructure, from IP enabled cameras to access control
- **Video Surveillance** – Monitoring and recording solutions ensure you always have a view of what's happening on your premises
- **Access Control & Visitor Management** – Track the movement of people in your environment—make sure that the right people (and only the right people) have access to the right areas
- **Mantraps and Pass-throughs** – Create areas designed to restrict access and movement of suspicious visitors
- **Communication & Alerting** – Two-way communication solutions to enable security personnel and users to interact quickly and easily to address security threats

## Purchasing Vehicles

- **ITT72** (Converged Voice & Data Communication Systems, Services & Equipment)
- **ITC68** (Data Cabling Products and Services)
- **ITC71** (IT Hardware, Project Management, Integration, & Maintenance)
- **ITC73** (Security, Surveillance, Monitoring, & Access Control Systems)
- **OFF50** (Audio, Video & Presentation Solutions)
- **DCAMM Certification**
